As such, the federal statute mandates that the Commission review an institution in accordance with criteria outlined in the federal regulations. Implicit in all federal requirements mandating a policy or procedure is the expectation that the policy or procedure is in writing and approved through appropriate institutional processes, published in appropriate institutional documents accessible to those affected by the policy or procedure, and implemented and enforced by the institution.
2. Institutions are required to document compliance with those criteria when reviewed for initial or continued accreditation. The SACSCOC Liaison's responsibilities include keeping abreast of SACSCOC policy requirements related to these federally mandated criteria, communicating these requirements to the President and Institutional Officers, and assisting with monitoring compliance with the SACSCOC policy requirements related to federal requirements.
